- 800x480!
- 800Mhz!
- 256MB RAM!
- FM Modulator!

Support: 🔼 Manual PND [DE] | 🔼 Manual PND [EN]

CTFPND-1 V5 is a multimedia GPS navigation system with a large 7" digital touchscreen of 800x480 resolution. The device is equipped with a very sensitive GPS module based on SiRFStar III 12 channels chipset. The device also has an integrated FM transmitter/modulator which will enable you to hear all sounds on your car speakers wirelessly.

Multimedia features allow to view movies and photos and to listen to music from the built-in speakers. The device supports all popular multimedia formats. As a memory expansion it uses SD/SDHC cards.

Your software (eg. navigation iGO, PTV Fleet/Truck Navigator,...) can be uploaded by USB to the internal 8GB flash or can be started from a SD card.

The CTFPND-1 V5 is a 7" Touchscreen PND on Windows CE 6.0 basis with integrated GPS receiver. Therefor the CTFPND-3 is the perfect plattform for your telematics application. The extra-high native resolution of 800x480 enables a perfect viewing quality.

The integrated RS232 interface can be used for external devices or for a TMC receiver.

Note: This PND is an offer primarily meant for business and project customers. End consumers should only consider purchasing this device when they have appropriate experience.
